Library users rated the library facilities like seating, lighting, and temperature control highly, but some of them suggested modernization and up gradation of equipment and resources.

**Noise Level:**

Library users expressed concerns about noise levels in the library, especially during peak hours. Some suggested that the library should implement strict rules and regulations to ensure a peaceful study environment.

**Accessibility:**

Library users suggested that the library should be more accessible to users with disabilities and provide more accommodations such as assistive technology and designated study spaces.

**Communication:**

Library users suggested that the library should improve communication with users through regular newsletters, social media updates, and feedback mechanisms

**Conclusion:**

Overall, the feedback suggests that our library is doing well in terms of resources, services, and facilities. However, there are areas for improvement, including increasing the collection of new and relevant resources, offering more training and workshops, ensuring a peaceful study environment, improving accessibility, and enhancing communication with users. The library should focus on addressing these areas to enhance the overall experience of the library users and ensure that they have access to the resources and services they need for their academic and research pursuits

Acting Principal

*Bachhao*
